Crosman Adjustable Sear Spring Kit Installation

- 1) Remove one or both hand grips with a flat head screwdriver.
- 2) Remove the stock sear spring by grasping it from the bottom, pushing up, then sideways.
- 3) Install adjustable kit as shown in the photo. It helps to have the adjuster fully threaded to uncompress spring as much as possible.
 - a. Fully threaded also results in the softest trigger.
- 4) Reinstall hand grip(s).
- 5) Enjoy shooting!
